

Mechanics Bank

Direct Deposit Guide

What is Direct Deposit?

With Direct Deposit, your employer or other third party can send your pay or other payment electronically directly to your Mechanics Bank checking or savings account. Direct Deposit payments are convenient and secure and they eliminate the risk of lost, stolen or forgotten checks. There is no setup or monthly fee for Direct Deposit at Mechanics Bank.

How to set up Direct Deposit

Your employer (or other third party) may ask you to complete a direct deposit form that will ask for several personal details, including your name, address, and signature for authorization of the direct deposit.

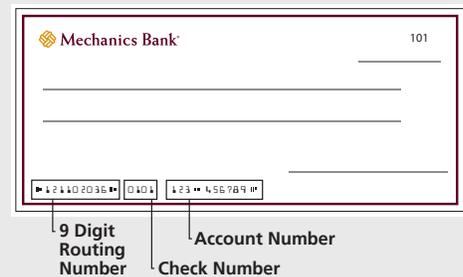

In addition to the above information, the most important data on the direct deposit form is your bank account information. In some cases, you may be asked to attach a voided check or deposit slip.

Bank Account Information

1. Your Name:
2. Your Account Number:
This can be found on your checks, through Online Banking or our Mobile App.
3. The Mechanics Bank Routing Number is: **121102036**
4. Type of Account: Checking Savings

How to locate your account and routing numbers

Check: If you are looking at a paper check, you can find your account and routing number as follows:

Online Banking: Go to the account for which you want the account number and click the account name to open the Account History page. Select the Account Details dropdown to expand the available information for the account. The Account Type, Account Number, and Routing Number.

Mobile Banking App: Go to the account for which you want the account number and click the account name to open the Account History page. Click on the Details link to expand the available information for the account. The Account Type, Account Number, and Routing Number.
